

Statement on the POP Regulation and US TSCA

Regulation (EU) 2019/1021 (Stockholm Convention) & Toxic Substances Control Act

KE-POP-TSCA · R: 03 | A: EN | V: DU | D: 08_26

Applicable frameworks: Regulation (EU) 2019/1021 on persistent organic pollutants (consolidated as of 1 Jan 2026, verified 28 Jul 2026) and the US Toxic Substances Control Act (TSCA), in particular Section 6(h).

This combined statement answers the frameworks POPs and TSCA, which are regularly requested together in customer campaigns.

We, Rainer Schneider Kabelsatzbau und Konfektion GmbH & Co. KG, declare on the basis of the information provided by our suppliers and distributors:

1. Persistent organic pollutants (POP)

Regulation (EU) 2019/1021 implements the Stockholm Convention in the EU and prohibits or restricts the persistent organic pollutants listed in its Annex I, including decaBDE, PFOA, PFOS, PFHxS, SCCPs and Dechlorane Plus.

According to the information available from our suppliers, the articles we place on the market comply with the substance prohibitions and limit values of Annex I of Reg. (EU) 2019/1021. Where an article contains a listed substance within a permitted exemption above the reporting threshold, we identify this on our business documents on an article-specific basis (analogous to our REACH Art. 33 practice); we do not issue a blanket free-of statement.

2. US Toxic Substances Control Act (TSCA)

For the five persistent, bioaccumulative and toxic substances restricted under TSCA Section 6(h) — decaBDE, PCTP, PIP (3:1), 2,4,6-TTBP and HCBd (rule status: March 2021, unchanged) — the following applies:

According to the information available from our suppliers, these substances are not used above the permitted limits in the components we process. We support enquiries on further TSCA requirements (e.g. Section 8(a)(7) PFAS reporting by US importers) on an article-specific basis upon request within the scope of our suppliers' feedback.

3. Data basis

This statement is based on data from our supply-chain partners; no express or implied warranty is associated with it. We will update the statement in the event of changes to the legal situation or new findings from the supply chain.

We maintain a regular dialogue with our suppliers in order to react to future substance restrictions. We reserve the right to update this document; current versions are available at <https://schneider-kabelsatzbau.de/downloads>. For questions on substance restrictions or specific articles, contact us at compliance@schneider-kabelsatzbau.de.
